

# Kirkhill Shake™ Roofing

Kirkhill's dedication to sustainability begins with its mission to develop high value end uses for end-of-life rubber materials. Through innovation, technology, and teamwork, Kirkhill launches its new Kirkhill Shake™ environmentally friendly green rubber roofing system made from compression molded recycled tire crumb rubber. The high performance life-time roofing system is designed to duplicate the look and texture of cedar shakes and utilizes up to 500 scrap tires per home.

- Easy to install – self interlocking and nails
- 100% California scrap tire derived
- 100% Post-consumer recycled
